

Cleaning

Description

To Jesus:

Baking soda & vinegar can improve laundry clean & smell
One half cup to two cups baking soda (lowers suds & hard water) added to the bottom of the washing machine before adding clothing (& pretreated on most stains for 30 min, 12 hours for grease) & 1/4th (if adding it regularly & if using a front loader) to one half cup vinegar (distilled white- not cleaning vinegar) to the rinse or in the fabric softener dispenser (but not in the wash) both absorb odors, clean stains, brighten clothes, soften fabric, clean the washer & leave a natural fresh smell. Vinegar also helps remove mildew (mold). Avoid vinegar with elastic clothing, & not with bleach or ammonia.
