

## Foods for infection prevention & treatment

### Description

?  
??  
?  
??

Foods: What foods help prevent & treat viral & bacterial infections in studies & practice

Viral & bacterial

Elderberry 12 oz juice (w/ zinc), cut with 12 oz water & a little honey, 3 days all infections in studies

Only 10 hours if add zinc for viral

Seaweed or iodine (lorinse or other elemental iodine)

Garlic & leeks (onions also alum)

Coconut oil (lauric acid becomes monolaurin)

Oregano (also in Italian seasonings)

Antibacterial

Green leaf stevia (tastes like sweet lettuce with cooked vegetables)

Black seed oil

Honey (raw & organic)

Taro

Stinging nettle

Heat treatment

Hair dryer or steam sixty seconds slow warmup into mouth & nose, 5 minutes highest comfortable heat, every eight hours four treatments no symptoms at 30 hours for respiratory illnesses. Staying out of cold drafts allows 90% drop in most symptoms relief after first treatment. If conductive heater sit a comfortable distance as long as possible.

## Elderberry

Does elderberry stop all infections in three days as reported in medical journal studies & with over half a dozen farmers I know who grow it?

Does it stop viral respiratory infections in 10 hours if 60-100mg zinc is added

## Iodine

Does iodine mouth rinse for 30 seconds, then gargle 30 seconds, then spray in the base of nose, & breathing in the vapors for a couple minutes every half hour stop infections within 2 hours?

Is dental molecular iodine (like Iorinse) so much safer that most dentists have been using it for years at 500x stronger than the very effective 0.5% povidine iodine (used in the below studies)?

## Hydrogen peroxide

Is (food grade best) hydrogen peroxide mouth rinse, gargle, nose spray & vapor breathing next most effective after iodine?

## Honey

Does honey stop coughs, induce sleep, reduce upper respiratory tract infections, & treat burns & wound infections?

## Green leaf stevia

Is green leaf stevia (tasty in cooked vegetable dishes or put in capsules) more effective than a triple antibiotic combination against Lyme disease?

## Combination

Does using all these foods in combination prevent & at higher amounts treat almost all infectious diseases?

## Elderberry

Elderberry is a fruit in the blueberry family that is cooked & served as juice or the flower is used in capsules. A 12 oz of juice (I usually add 12 oz water) is delicious and appears to stop all bacterial & viral infection symptoms in three days, same as over half a dozen farmers I know reported when

growing & storing it for when they have respiratory infection symptoms. It's the only thing they take when sick, one family for four generations.

Elderberry makes zinc many times more effective than taking zinc alone (a zinc ionophore). A 12 oz elderberry drink, or 1g or more of concentrated elderberry and 60 -100mg zinc appears to stop viral symptoms in 10 hours. I've had dozens of people recover overnight taking elderberry & zinc with no symptoms in the morning & full recovery of energy.

Elderberry is an antiviral

Elderberry juice, extracts, & powder appear to work against viral infections and stimulate the immune system. Elderberry speeds recovery from multiple types of viral infections significantly.

[Inhibition of several strains of influenza virus in vitro and reduction of symptoms by an elderberry extract \(Sambucus nigra L.\) during an outbreak of influenza B Panama 10.1089/acm.1995.1.361](#)

[Randomized study of the efficacy and safety of oral elderberry extract in the treatment of influenza A and B virus infections.](#)

## Iodine

Iodine is effective in seaweed as food to prevent deficiency & infections. In liquid form it is nearly 100% effective against respiratory infections with mouth rinse then gargle, then nasal spray. Most studies just use mouth rinse or gargle or spray when all three are much more effective together.

Molecular iodine used as a mouth rinse when they start for clients by most dentists is so much safer than regular iodine dentists use it at 500x stronger- 100ppm elemental/molecular iodine vs 0.2ppm of elemental iodine in povidine.

Coconut oil (monolaurin from lauric acid)

Half of coconut oil is lauric acid which our bodies make into monolaurin. Monolaurin has strong antiviral, antifungal, antibacterial (including against lyme disease & resistant infections) benefits. This site has most of the studies on monolaurin.
