

Licorice

Description

Licorice

Licorice root (black, red is anise) may help stop:

gastrointestinal problems like peptic ulcers, heartburn, reflux, mouth sores, throat pain & infections, [functional dyspepsia](#) (FD) abdominal discomfort, candida, leaky gut, nausea

upper respiratory bacterial & viral infections, coughing

asthma & COPD

eczema & acne when used topically

diabetes

menopausal symptoms including hot flashes

constipation

stress

Licorice root may help:

weightloss

Adverse effects

Large amounts or long term use may increase blood pressure possibly by reducing potassium. Supplemental potassium including in vegetables may help prevent the adverse effects.
