Moringa

Moringa is a plant that has a lot of nutrients including a complete protein & appears to reduce blood sugar, triglycerides & vLDL & raise HDL, great for type2 diabetes & heart disease as well as:

pain

anxiety & stress

high blood pressure

arthritis

viral & bacterial infections

lung infection symptoms & asthma

ulcers & colitis

protect the kidneys & the liver

reduce melanoma, colon, pancrease, & cervical cancer in studies

Used topically it appears to help wounds heal

It may help to disinfect water.

It may chelate arsenic out of the body.

When given 3-5 days after childbirth it appears to increase milk production.

It can't be used in pregnancy as it is a strong abortifacient.
