

Transgender

Description

I believe God loves all people equally, no matter their gender attribution. I believe God understands people can struggle with avoiding judging others.

Transgender was recognized as being rare, until hormone altering chemicals like atrozine were used in large amounts.

Adults who believe they are a different gender than they are identified as used to get a year of psychotherapy before getting hormones &/or surgery.

People who are children, preteen & teens never used to get puberty/hormone blockers.

Sweden & Finland were earliest in supporting teen transition. They found hormones & surgery didn't help the depression, overall functioning & not even the gender dysphoria itself. So now instead of surgery & hormones, they are using psychotherapy as the first line treatment for depression accompanied by gender dysphoria.
